COPPER PENNY¹
SRI: 53 • LRV: 28

PREMIUM COLOR

NATURAL RUST¹
SRI: 32 • LRV: 10
(Subject to upcharge)

FINISHES DEVELOPED BY
 steelscape

0 25 50 75 100

MEASURED ON A SCALE OF 0 - 100

Light Reflective Value (LRV)
Measures how much visible light a color reflects and how much it absorbs. The higher the LRV, the more reflective it will be.

Solar Reflective Index (SRI)
Measures the amount of heat reflected from painted metal roof. The higher the SRI value, the cooler the metal will be, helping cut down on energy costs to keep your home cool.

REPRESENTATION OF COLORS MAY VARY DUE TO PRINTING LIMITATIONS.

Sample color chips are available upon request. Consult your ASC Building Products representative for more information.

¹Please note, these colors are batch sensitive (may have color variation) and are directional in nature. Different batches are not to be mixed on projects. We recommend you request a sample of current stocked material to review actual color before ordering to ensure color accuracy. We are not responsible for color variations.

SRI=Solar Reflective Index. LRV=Light Reflectance Value. GA= Gauge of Steel. *Clear acrylic coated.
SRI values in accordance with ASTM E1980 and are based on independent testing. Cool Roof Rating Council (CRR) performance values (for CA Title 24) are based on color families and will differ from those listed above. Please visit www.ascbp.com for additional information.
