SRI - Solar Reflectance Index

A measure of the constructed surface's ability to stay cool in the sun by reflecting solar radiation and emitting thermal radiation.

SR - Solar Reflectivity

The fraction of solar energy that is reflected by a surface on scale of 0 to 1. SR doesn't factor in emissions of thermal radiation.

- Superior resistance to chalking, fading and scratching.
- Exceptional color and gloss retention.
- Outstanding color consistency.
- Superior weatherability.

Seeing is believing.
